

Caveatron Bill of Materials

Hardware Revision: C

Date: 2024-06-08

[illegible]

Item	Qty	Manufacturer	Mfr. P/N	Description	Suggested Vendor Link	Photo
Laser Rangefinder	1	JRT Meter Tech., Co, Ltd.	Unknown	40m – 60m Laser Distance Sensor Module	Egismos (HEX) Ebay (ASCII) Alibaba (HEX) Alibaba (HEX) Alibaba (probably HEX) Availability changes frequently. Sites linked above has availability as of the date of this BOM	
Notes: <i>Used for station distance measurements.</i> There are several variants of this module including those that use ASCII or HEX-based commands both of which are supported by the Caveatron. Based on the datasheets I have reviewed I think any variant of this style should work. This style is the preferred LRF module and the only one for which the Rev C enclosure is designed to accommodate.						

IMU Selection Options Summary for the parts on the next page – listed for each PCB board version

(Options listed in order of preference)

PCB Rev C.4

Witmotion RM3100 and LSM6DS33

PCB Rev C.3 and PCB Rev C.2

Option #1: Witmotion RM3100 and Pololu MinIMU-9 v5

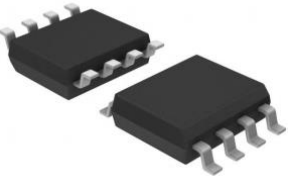

Option #2: Witmotion RM3100 and Pololu AltIMU-10 v5

Option #3: Pololu MinIMU-9 v5 only

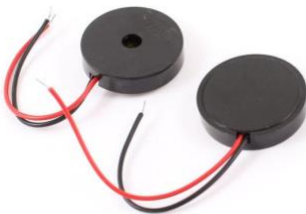

Option #4: Pololu MinIMU-10 v5 only

Item	Qty	Manufacturer	Mfr. P/N	Description	Suggested Vendor Link	Photo
Compass Module HIGHLY RECOMMENDED Used in PCB Rev C.2 (optional), C.3 (optional), C.4 (required)	1	Witmotion	RM3100	WitMotion High-Precision RM3100 Military-grade Magnetometer Sensor	Amazon or Witmotion	
Notes: Used to determine the azimuth angle of the Caveatron. This is the best currently available low-cost magnetometer module option. This magnetometer has proven more accurate, reliable and with less drift than another other tested. It must be used with one of the IMU modules below that contain an accelerometer and gyroscope.						
IMU Module 1 Used in PCB Rev C.2, and C.3. Is not used with C.4	1	Pololu	MinIMU-9 v5 (#2738) Or AltIMU-10 v5 (#2739)	MinIMU-9 v5 Gyro, Accelerometer, Compass (LSM6DS33, and LIS3MDL Carrier)	Pololu	
Notes: Used to determine orientation of the Caveatron and measure inclination. Only used in PCB Rev C.3 and C.4. Can be used with or without the RM3100. The AltIMU-10 v5 is an equivalent part and can also be used (the altitude sensor is not used). The MinIMU-9 and AltIMU-10 v3 and v4 are still supported by the code and electronics but are no longer available.						
IMU Module 2 Used in PCB Rev C.4 only	1	Pololu	#2736	LSM6DS33 3D Accelerometer and Gyro Carrier with Voltage Regulator	Pololu	
Notes: Used to determine inclination and roll angle of the Caveatron. This part is used only in PCB Rev C.4 and must be used with the RM3100.						

See summary of these combination options on the previous page.

Item	Qty	Manufacturer	Mfr. P/N	Description	Suggested Vendor Link	Photo
Battery Pack OPTION 1	1	Dantona Industries	L37A52-2-1-2WX	Li-Ion Battery Pack, 3.7V, 5200 mAh, 18650, wire leads with connector	Digikey	
Notes: <i>Primary system battery.</i> This one is the best choice since it is lower cost and already has a connector.						
Battery Pack OPTION 2	1	Tenergy	31001	Tenergy Li-Ion 18650 3.7V 5200mAh Rechargeable Battery PCB module with Bare Leads	Tenergy	
Notes: <i>Primary system battery.</i> Identical size and capacity to Option 1, but more expensive and you must add a connector.						
Font/Graphics IC	1	Winbond	W25Q128JVSIM	W25Q128 SPI flash memory IC, 128 Mbit, quad 8-SOIC	Digikey and many other source	
Notes: <i>Contains the fonts and graphics used for the GUI.</i> You must use the 128Mbit 8-SOIC package version – other capacities may not work. It is soldered to the pad location on the underside of the Teensy 4.1 that is directly under the micro-SD slot and closest to the edge.

Item	Qty	Manufacturer	Mfr. P/N	Description	Suggested Vendor Link	Photo
Power Switch Module	1	Pololu	2808	Mini Pushbutton Power Switch with Reverse Voltage Protection, LV	Pololu	
Notes: Turns on and off system power when pushbutton power switch is pressed and also controls timed auto power-off.						
Piezoelectric Buzzer	1	Uxcell	A14062400ux0199	uxcell A14062400ux0199 5 Pcs DC 2-28V 80Db Sound Electronic Passive Buzzer Alarm Black, 22 x 4.5 mm	Amazon	
Notes: Indicator buzzer.						
2.8V Voltage Regulator USED IN PCB REV C.3 and C.4 (or to upgrade C.2)	1	Microchip Technology	MCP1700-2802E/TO	Linear voltage regulator IC, 2.8V, 250mA, TO92	Digikey	
Notes: Regulates battery voltage to keep Real Time Clock active when Caveatron is turned off. Replaces coin cell battery used in PCB Rev C.2.						
1uF Ceramic Capacitor USED IN PCB REV C.3 and C.4 (or to upgrade C.2)	2	TDK	FG18X7R1E105K RT06	Ceramic Capacitor, 1uF, 25V, Radial leads	Digikey (and many others)	
Notes: Stabilizes output voltage of RTC regulator above. Most any ceramic capacitor of 1 uF will work so long as it is rated to 6V or higher.

LIDAR OPTION 1	1	Slamtec	RPLIDAR A1M8	LIDAR 360 Degree Laser Range Scanner, 12 m range	Robot Shop	
Notes: <i>Scanning LIDAR sensor.</i> Other models that should also work but have not been tested include RPLIDAR A2M6, A2M7, A2M8, and A3. These LIDARs are triangulation-based. Available from several sources.						
LIDAR OPTION 2	1	Slamtec	RPLIDAR S2	LIDAR 360 Degree Laser Range Scanner, 30 m range	RobotShop	
Notes: <i>Scanning LIDAR sensor.</i> The S2 has 2.5x the range, can collect 4x the number of points per second, has a faster rotation rate, and is smaller, but is more expensive. This LIDAR is a time-of-flight LIDAR. Available from several sources. Watch out since there are several variants out there. A true unit may also be referred to as an S2 R2. Some models which are referred to as S2L are about \$100 cheaper than a true S2, but can only get about 12 m of range. There is also an Ethernet version – the S2E but you don't want that version either. Also there may be some defective units out there as the first one I received only reached 14m even though it appears to be a true S2.						

Item	Qty	Manufacturer	Mfr. P/N	Description	Suggested Vendor Link	Photo
Threaded Inserts for Enclosure	10	Initeq		#6-32 Threaded Heat Set Inserts for 3D Printing (Long)	Ebay	
Notes: Heat set threaded inserts used in 3D printed enclosure.						
Threaded Inserts for external mounting (Optional)	1	Initeq		#1/4-20 1/4" Threaded Heat Set Inserts for 3D Printing (Short)	Ebay	
Notes: Heat set threaded inserts used in 3D printed enclosure for external mounting. This is an optional part if you plan to attach something external to the Caveatron (like a handle) or mount it to a tripod.						
Threaded Inserts for RPLIDAR A1M8 Standoffs For RPLIDAR A1M8 only	4	Initeq	INM2504	M2.5-0.4 M2.5 Threaded Heat Set Inserts for 3D Printing (Long)	Ebay	
Notes: Heat set threaded inserts used in 3D printed LIDAR enclosure for RPLIDAR A1M8 standoffs. The standoffs that screw into these are included with the RPLIDAR.						

Item	Qty	Manufacturer	Mfr. P/N	Description	Suggested Vendor Link	Photo
LIDAR Window OPTIONAL For RPLIDAR S2 only	1	JMX	N/A	3.1" Acrylic Dome	Amazon	
Notes: Window for the RPLIDAR S2. This will only work for a TOF type LIDAR. Curved windows do not work with triangulation LIDARs like the A1 series. The RPLIDAR S2 can be used without this window using a special cover available in the 3D printed parts. However, if you plan to use the LIDAR in a very wet cave, this cover is recommended.						
LIDAR Window For RPLIDAR A1M8 only	1	Various	N/A	Clear Acrylic Sheet, Transparent, 0.118" Thickness	Amazon Amazon Amazon and other sources	
Notes: Transparent acrylic sheet for LIDAR window. This 0.118" transparent acrylic sheet is used for the RPLIDAR A-series windows. Requires cutting to size. Acrylic seems to be the most transparent with the least distortion and defects of the various clear plastics tested, which is important for getting good LIDAR and rangefinder readings. A flat window is required for the A-series triangulation-based LIDAR modules.						
LRF Window Material	1	Various		Clear Acrylic Plexiglass Transparent - 3/32" (0.09)	Amazon Amazon and other sources	
Notes: Transparent acrylic sheet for LRF window on Main Body. A small variation in thickness is acceptable for this part.						

Item	Qty	Manufacturer	Mfr. P/N	Description	Suggested Vendor Link	Photo
Strap Attachment Hardware	1	122317	Hillman Group	D-Ring Hangers	Lowes Amazon	
Notes: Small D-rings for attaching neck strap. Available from multiple sources and similar parts likely available from other vendors.						
Neck Strap	1	DOROM	N/A	DOROM Universal Adjustable Slim Shoulder Sling Neck Strap for All Camera DSLR SLR	Amazon	
Notes: Neck Strap. This neck strap works well, but other options are available. Recommend a nylon camera strap of 52-60” in length and about 3/8” wide in the ends.						
O-Ring Seals	4 feet	The O-Ring Store	N50.103	0.103" (2.62mm) Buna-N 50 O-Ring Cord Stock, Black	O-Ring Store	
Notes: O-Ring material for seals in main enclosure and LIDAR module. This 50 durometer material is preferred over more readily available 70 durometer since it is softer and can make a tighter seal. Must cut to length and glue ends (this vendor also sells O-ring glue in small quantities.) Other vendors sell similar material.						

Other Required Items:

Caveatron Rev C Printed Circuit Board

Single row male headers, 2.54 mm (0.1") pitch

Double row female headers 2x20 (for 40 pin LCD Connector), 2.54 mm (0.1") pitch

Soldering supplies

6-32 x 1" flat head machine screws (4x)

6-32 x 3/8" flat head machine screws (4x)

6-32 x 3/8" pan head machine screws (4x)

6-32 x 5/8" pan head machine screw (1x)

4-20 x 1/4" thread rolling screws (10x)

M4x0.7 x 6mm (or 5mm) pan head machine screws (4x)

4-20 x 1/2" thread rolling screws (6x)

2-28 x 1/4" thread rolling screws (11x)

PETG filament for 3D printed parts

O-Ring grease

O-Ring epoxy

Size 114 O-ring (for the LIDAR-Main body interface or make your own from the O-Ring cord above)

Flexible waterproof epoxy sealant

Adhesive-backed foam

Tape (Kapton or cellophane)

Notes: *For assembly and electrical interconnections between boards.*
