Caveatron Bill of Materials

Hardware Revision: B

Date: 2019-12-18

All the parts in this list have been tested with the Caveatron and integrated into the code. For some parts, alternate options are available.

Item	Qty	Manufacturer	Mfr. P/N	Description	Suggested Vendor Link	Photo
Main Processor Notes: The m	1 ain sys	PJRC Electronics tem processor. Av	Teensy 3.6 ailable from n	Teensy 3.6 nultiple vendors. Versions with	PJRC Store and without the	pins pre-installed are available (link above is with pins).
Touchscree n LCD OPTION 1	1	Coldtears Electronics	N/A	3.5 inch TFT LCD module w/Font IC 480x320 full angle Arduino DUE MEGA 3.2 4.3	<u>Ebay</u>	

Notes: The display and user interface. Although slightly smaller, the contrast and viewing angle make this the preferred choice.

Item	Qty	Manufacturer	Mfr. P/N	Description	Suggested Vendor Link	Photo
Touchscree n LCD OPTION 2	1	Coldtears Electronics	N/A	4.0" inch TFT LCD module w/Font IC 480x320 ILI arduino DUE MEGA 3.2 2.5 STM32	<u>Ebay</u>	
Notes: Alterno	ate disp	olay. Same resolut	ion as the 3.5"	but in a larger size. The angle	viewing contras	st is not as good as the 3.5" display.
Graphics Module (SPI Flash Memory)	1	Multiple (Winbond IC)	W25Q64 or similar	W25Q64 64Mbit 8MByte Flash Memory Module Data Flash SPI Interface	Amazon	Book Was a series of the serie

Notes: Storage for fonts and graphics used in the GUI. SPI Flash memory must be Winbond W25Q32, W25Q64, or W25Q128 (memory size should be 32MB or higher.)

Winbond W25Q16 (16 MB) can also be used with a reduced graphics set.

Laser Rangefinder OPTION 1	1	Uni-T	UТ390В	Laser Distance Meter	Ebay. Availability very limited and changes frequently.	UNI-T 07308	

Notes: Used for station distance measurements. This item is long since discontinued but can still be found online from a few sources. Do not confuse this with the UT390B+, which is widely available but does not have an accessible serial port, so is not useable. The UT390B+ has a bubble level in the upper left which the UT390B does not. The UT390B must be disassembled and the LCD removed to access the electronics board. The JRT rangefinder (OPTION 2) has wider availability, but has operational disadvantages. The UT390B remains the preferred rangefinder if you can find one.

Laser Rangefinder OPTION 2	1	JRT Meter Tech., Co, Ltd.	Unknown	100m Laser Distance Sensor Module	Ebay Availability changes frequently.	NOW SEE STATE OF THE PARTY OF T

Notes: Used for station distance measurements. This rangefinder module is similar in size to Option 1 above and is easier to find. However, it's method of operation is less well suited to the Caveatron since it has a variable measurement time (rather than the UT390B's fixed 1 sec measurement time) and can take up to 3 sec to acquire a reading or timeout. This means that when scanning in Passage mode, you can end up with fewer reference points and a less accurate scan.

Laser Rangefinder	1	JRT Meter Tech., Co, Ltd.	Unknown	40m – 60m Laser Distance Sensor Module	Ebay Availability changes	
OPTION 3					frequently.	

Notes: *Used for station distance measurements*. This rangefinder module has not been tested but it appears to operate with an identical protocol to the Option 2 rangefinder, so would be compatible. However, it also likely has the same performance considerations. It is significantly smaller than the others.

Item	Qty	Manufacturer	Mfr. P/N	Description	Suggested Vendor Link	Photo
IMU/ Compass Module OPTION 1	1	Pololu	AltIMU-10 v3 (#2469) Or AltIMU-10 v4 (#2470)	AltIMU-10 v3 Gyro, Accelerometer, Compass, and Altimeter (L3GD20H, LSM303D, and LPS331AP Carrier)	<u>Pololu</u>	

Notes: *Used to determine orientation of the Caveatron and measure azimuth and inclination.* The AltIMU-10 v4 is an equivalent part and can also be used. The older v3 and v4 versions of the modules are preferred over the newest AltIMU-10 v5 or the MinIMU-9 v5 since the magnetometer in this module (LSM303D) has a lower noise output than the LIS3MDL used in the newest versions. However, if the older modules becomes unavailable, the Caveatron code will be updated to support the v5 modules.

Compass Module	1	Pololu	LSM303D (#2127)	LSM303D 3D Compass and Accelerometer Carrier with Voltage Regulator	<u>Pololu</u>	
OF HON 2						

Notes: *Used to measure azimuth and inclination.* As an alternative to the single AltIMU, separate compass and gyroscope modules are supported, but must be co-aligned with each other. This module uses the same accelerometer and magnetometer IC as the AltIMU-10 v3 and v4.

Gyroscope Module	1	Pololu	L3GD20H (#2129)	L3GD20H 3-Axis Gyro Carrier with Voltage Regulator	<u>Pololu</u>	
OPTION 2			Or L3GD20 (#2125)			
			, ,			

Notes: *Used to supplement compass module to improve orientation measurement.* As an alternative to the single AltIMU, separate compass and gyroscope modules are supported, but must be co-aligned with each other. This module uses the same gyroscope as the AltIMU-10 v3 and v4. The older L3GD20 module can also be used.

Battery Pack OPTION 1	1	Adafruit	354	Lithium Ion Battery Pack - 3.7V 4400mAh	<u>Adafruit</u>	PKCELL ICR18650 4400mAh 3.7U

Notes: *Primary system battery.*

	OPTION 2	1	Tenergy	354	Tenergy Li-lon 18650 3.7V 5200mAh Rechargeable Battery PCB module with Bare Leads	<u>Walmart</u> <u>Tenergy</u>	THE STATE OF THE S
--	----------	---	---------	-----	--	-------------------------------	--

Notes: *Primary system battery.* Higher capacity battery with identical dimensions and voltage to Option 1. Does not include connector unlike Option 1.

Item	Qty	Manufacturer	Mfr. P/N	Description	Suggested Vendor Link	Photo
Battery Charging Module	1	Adafruit	259	USB Lilon/LiPoly charger - v1.2	<u>Adafruit</u>	O O O O O O O O O O O O O O O O O O O

Notes: Controls the charging of the LI-lon battery pack and provides charge indication to power switch LED. Default charge current is 500 mA, but can be increased to 1200 mA by adding appropriate resistor (see assembly instruction.)

Battery	1	Sparkfun	TOL-	LiPo Fuel Gauge	<u>Sparkfun</u>
Gauge			10617		
Module					

Notes: *Monitors battery level.* Contains a MAX17043 battery fuel gauge IC. It is highly recommended to purchase this directly from Sparkfun. These can be found at other, cheaper sites, but often use a counterfeit Maxim IC that does not function properly.

LIDAR	1	Slamtec	RPLIDAR	LIDAR 360 Degree Laser	RobotShop	
			A1M8	Range Scanner		
						ALEXANDER OF THE PARTY OF THE P
						MANTANIA

Notes: Scanning LIDAR sensor. Other models that may also work but have not been tested include RPLIDAR A2M6, A2M8, and A3M1. Available from several sources.

Item	Qty	Manufacturer	Mfr. P/N	Description	Suggested Vendor Link	Photo
Voltage Regulator – 5V	1	Pololu	2119	5V Step-Up/Step-Down Voltage Regulator S7V7F5	Pololu	
Notes: Power	supply	for Teensy.				
Voltage Regulator – 5V	1	Pololu	2123	Pololu 5V Step-Up/Step- Down Voltage Regulator S7V8F5	Pololu	
Notes: Power	supply	for LIDAR. A Polo	lu 2118 (see b	l elow) could also be used if set	to 5.0 V.	
Voltage Regulator – Adjustable	1	Pololu	2118	Pololu Adjustable Step- Up/Step-Down Voltage Regulator S7V8A	<u>Pololu</u>	

Item	Qty	Manufacturer	Mfr. P/N	Description	Suggested Vendor Link	Photo
Power Switch Module	1	Pololu	2808	Mini Pushbutton Power Switch with Reverse Voltage Protection, LV	<u>Pololu</u>	
Notes: Turns o	on and	off system power	when pushbu	tton power switch is presses an	d also controls t	imed auto power-off.
Piezoelectri c Buzzer	1	Uxcell	a140624 00ux017 3	Uxcell 5 Pcs DC 1-30V 90Db Sound Passive Electronic Buzzer Alarm Black, 30 x 6 mm	<u>Amazon</u>	
Notes: Indicat	or buz	zer.			<u>'</u>	
Power Switch & Charging LED	1	Adafruit	3350	Rugged Metal Pushbutton - 16mm 6V RGB Momentary	Adafruit Amazon	

Notes: On/Off power switch and charge indicating ring LED. This one enables separate colors on the ring LED for indicating charging and charge complete. Other 16mm momentary pushbutton switches from Adafruit are available with a single color LED, though they are longer in length. If you buy from another source be sure to get the common anode version.

Item	Qty	Manufacturer	Mfr. P/N	Description	Suggested Vendor Link	Photo
USB Jack	1	GT Contact	GT114200 -50	Waterproof USB Connector - Mini-B Female to Mini-B Female	<u>USBFirewire</u> <u>.com</u>	www.usefire.com
				arging, and loading of software th bare leads on one end.	and calibration	parameters. The RR-114200-10 version with solder pins on the back
USB Cap	1	GT Contact	GT1C5221 22	Seal Cap	<u>USBFirewire</u> <u>.com</u>	SBFireWire.com
Notes: Water	proof c	ap for USB jack.				
RTC Battery Holder	1	Unknown	PRT- 00783	Coin Cell Battery Holder - 20mm (PTH)	<u>Sparkfun</u>	

Notes: Holds a CR2032 battery to provide power to maintain the Real-time clock on the Teensy 3.6. Similar holders are available from many sources. So long as they can hold a CR2032 and the pins have a 20 mm spacing, it should work.

Item	Qty	Manufacturer	Mfr. P/N	Description	Suggested Vendor Link	Photo
LCD Connector Cable	1	N/A	N/A	40 pin IDE Male to Female Extension Cable, 4" (10 cm) or 6" (15 cm)	Ebay or Amazon	
	ne mis			nger than 6" would take up too	much space in t	connector you order has all 40 pins! Some IDE connector cables only have the enclosure. These are available from multiple vendors. mazon
Notes: Conne	ctor fo	r LIDAR Motor.	<u> </u>		•

Screen Protector	1	Supershieldz	N/A	iPhone SE and iPhone 5 Screen Protector	<u>Amazon</u>	PACK PACK D D D D D D D D D D D D D
			. Needs to be cut to rs produce a similar		ector film for iPl	hone 4, 4S, 5, 5s, or SE should work as they have the same screen
Strap Attachment Hardware	1	122317	Hillman Group	D-Ring Hangers	Lowes	
Notes: Small	D-rings	for attaching nec	<i>k strap.</i> Available fr	om multiple sources and similar pa	arts likely availal	ble from other vendors.
Neck Strap	1	DOROM	N/A	DOROM Universal Adjustable Slim Shoulder Sling Neck Strap for All Camera DSLR SLR	Amazon	

Notes: Neck Strap. This neck strap works well, but other options are available. Recommend a nylon camera strap of 52-60" in length and about 3/8" wide in the ends.

O-Ring Seals	4 ft	The O-Ring Store	N50.103/10	0.103" (2.62mm) Buna-N 50 O-Ring Cord Stock, 10' Piece, Black	O-Ring Store	The O Bism Otom

Notes: O-Ring material for seals in main enclosure and LIDAR module. This 50 durometer material is preferred over more readily available 70 durometer since it is softer and can make a tighter seal. Must cut to length and glue ends (this vendor also sells O-ring glue in small quantities.) Other vendors sell similar material.

Other Required Items:

PETG Filament for 3D Printing

Caveatron Printed Circuit Board

CR2032 Battery

Single row male headers

Single row female headers

Double row female headers 2x20 (for 40 pin LCD Connector)

6-32 x 1/2" Flat Head Screws (8x)

6-32 x 1/2" Pan Head Screws (2x)

6-32 x 3/8" Pan Head Screws (2x)

6-32 x 9/16" Pan Head Screw (1x)

6-32 Nut (3x)

O-Ring Glue

Ероху

Single sided foam tape

Tape (Kapton or electrical)

Heat shrink tubing

Solder

Notes: For assembly and electrical interconnections between boards. Several sizes of standard hardware required. More information in assembly instructions.

Retroreflective Card Date: 2019-11-07

Item	Qty	Manufacture r	Mfr. P/N	Description	Suggested Vendor Link	Photo
Retro- reflective Sheet	1	3M	580 or 680	Scotchlite Reflective Film	B.C.I Imaging Supplies for 8" wide or larger sheet OR Seton for half width 4" rolls.	3M

Notes: Retroreflective film for station card. Required to obtain positive return signal from laser rangefinder for all measurements and scans. 3M 680 film is used currently. 580 film is more readily available and is identical except for being more permanent when applied. A 6" (150 mm) wide roll is ideal but is expensive unless you are making many cards. A much cheaper half-width roll could be used as two side by side strips. Many other reflective tapes are available and may work fine but have not been tested. I would suggest a uniform material like the 3M Scotchlite as I am not sure how well the prismatic style reflective tapes would work since they might provide too strong a reflection or a non-uniform reflection that depends on where on the card you hit. But they may work fine too.

Station Card	1	Small Parts	B00E8S5686F	Kydex T Sheet, P3 Velour	<u>Amazon</u>		
Substrate			or 12x24"	Matte, 0.028" thickness			
			sheet – other				
			sizes have				
			different part				
			numbers				
			different part				

Notes: Substrate material for retroreflective station cards. Need to be cut to about 6.25"x7.5" (160x190 mm). Kydex was chosen since it is durable, thin and flexible, comes in a variety of easy to see colors, and is easy to cut. The material needs to be flexible since it will need to bend to accommodate some survey station locations. Other colors and sheet sizes available from this source – recommend getting a sheet big enough for at least two cards to have a spare. Many other plastics will work but it needs to be flexible. The 6x6" retroreflective sheet goes toward one edge of the card leaving about 1.5" to one side for the grommet and a handhold location.

3/8" Brass Grommets	1	Various	N/A	Various vendors	
------------------------	---	---------	-----	--------------------	--

Notes: Provide attachment point to retroreflective card. Place it near one corner on the side without the retroreflective sheet.
